QUALITY, INNOVATION AND DESIGN.

QUALITY

With over 30 years of experience in the heavy duty trucking industry, United Pacific Industries understand the rigors and stresses that our products are subjected to on the road. It is our mission to provide our customers with products of superior quality and reliability. In achieving this goal, United Pacific only partners with manufacturing facilities that conforms to our quality control requirements and standards. Our manufacturing partners meet or exceed ISO-9001 requirements. In addition, United Pacific's manufacturing partners must be equipped on site to perform the following quality assurance tests:

- AGING TEST
- AIR TIGHT TEST
- DUST TEST
- FLUX TEST
- PHOTOMETRIC TEST
- PULL FORCE TEST
- RAIN TEST
- SALT SPRAY TEST
- SHOCK TEST
- TEMPERATURE TEST
- HUMIDITY TEST
- VIBRATION TEST

United Pacific's manufacturing partners must maintain a track record of consistent quality and low product failure rate. Furthermore, our internal quality control structure allows us to function as the final quality control station prior to shipping. With the assistance of 3D computer technology, United Pacific can adhere to strict quality control standards during prototype creation and the production process. Our engineers and technicians perform a battery of tests to ensure that our products meet the demands of today's drivers and our goal to be first in quality.

INNOVATION

Known as the leader in innovation, United Pacific is dedicated to be the first to bring new and exciting products to the market. United Pacific's global expertise allows us to search the globe for new ideas and concepts. Not only do we search the globe for new products, United Pacific invest a significant amount of resources into our own research and development efforts.

With the assistance of advance 3D scanning technology, our engineers and designers can acquire accurate and precise data in seconds. The 3D data allows United Pacific to verify designs, perform quality assurance tests, and reverse engineer with unprecedented speed and accuracy. Digital inspection contributes to the early detection of shape problems, provides rapid feedback on design, and eliminates unnecessary work in downstream processes. Our rapid prototyping facility permits us to have a concept-to-shelf time of less than 5 months.

In addition, United Pacific's 3D printing capabilities permit our designers to have physical models of their design concepts in hours. The physical models allow our designers and marketing staff to evaluate and test the viability of different design ideas. Our rapid prototyping facility allow United Pacific to compress design cycles, improve manufacturing planning, shorten concept-to-shelf time, most importantly, generate new and innovative products.

DESIGN

Located near some of the nation's most progressive automotive design centers, United Pacific established the UP Design Studio in 2002 to consolidate our position as the design leader in the heavy duty trucking industry. UP Design Studio utilizes the latest generation of computer aided design (CAD) and studio/graphic software. The design studio is equipped with the newest computers and rapid prototyping systems. In addition, UP Design Studio is staffed by graduates from the nation's most prestigious design colleges.

Unlike our competitors, United Pacific's design and manufacturing capabilities mean that we carry more new and original items than our competitors. The establishment of the design studio will enable us to generate even more new products with significant shorter concept-to-shelf time. The reduction in development cost mean that we can develop products utilizing design based development processes. Design based product development allows United Pacific to create new product concepts based on designs incorporating driver demands and needs instead of economic considerations. United Pacific's emphasis on design distinguishes and positions us ahead of our competitors.

Light Emitting Diodes (LED)

Low Voltage Operation

A low voltage device, LEDs draw minuscule amount of current from a vehicle's electrical system compared to incandescent devices. Low voltage draw protects and prolongs a vehicle's electrical system.

Instant On

LEDs light up in microseconds. Research conducted by the University of Michigan Transportation Research Institute indicates that motorist respond quicker to LEDs than incandescent lights.

Rugged & Durable

Being a solid-state device, LEDs contain no moving parts and filaments to break. Produced with similar technologies as the latest microprocessor, LEDs provide unparalleled reliability and dependability.

Cold Start Capacity

Unlike many light sources in use today, LEDs do not require any special drivers or equipment to operate in extreme cold temperature. Solid State technology allows LEDs to function in inhospitable environments, down to -40°.

WARRANTY

With LED (Light Emitting Diodes) rated at 100,000 hours of operation and solid-state construction, United Pacific's LED lights are extremely reliable and durable. Purchase with confidence, United Pacific offers a complete line of LED lighting products with extended warranties. Please see the warranty policy page for more details.

INVENTORY & SHIPPING

United Pacific carries over 20,000 items in our California distribution center. No other company in the heavy duty trucking industry can match United Pacific in the variety and range of in-stock inventories. With an order fill rate of over 98.5%, United Pacific is the largest and most reliable supplier in the industry. Our shipping department ships 96.8% of all orders within 24 hours and 98.9% within 48 hours. United Pacific's vast inventory and prompt shipping has made United Pacific the only source for our customer's chrome and lighting needs.

ASSEMBLED IN U.S.A

United Pacific strives to provide today's drivers with innovative and exciting products that deliver exceptional performance and value. With our international background and expertise, we search the globe for the best and most reliable products. However, as an American company, we believe and support the American way of life. Look for the "Assembled in the USA" label on many of our products. Although the components are manufactured overseas, the products, bearing the "Assembled in the USA" labels, are hand assembled with pride in the United States.

WEBSITE

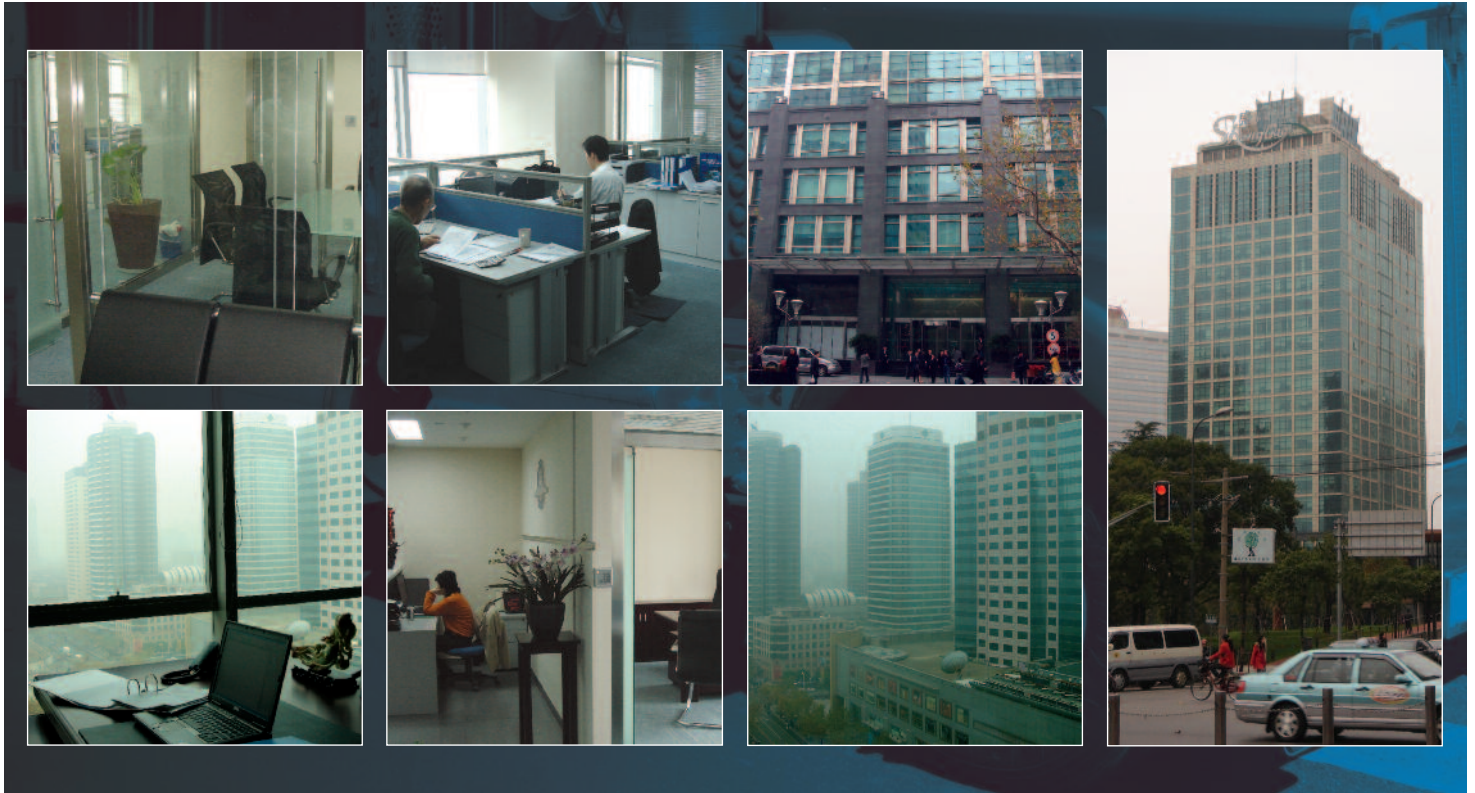

United Pacific strives constantly to improve our existing facilities and procedures. As a part of our continuous improvement process, United Pacific will soon be updating our website. The new website will be even more comprehensive and in-depth. In addition, we will incorporate an online ordering system that will enable our customers to order and receive shipping updates online. The online ordering system will only be available to authorized retailers. The new website is just another example of United Pacific's ceaseless pursuit to be our customer's only source for their chrome and lighting needs.

Hard at work for our customers

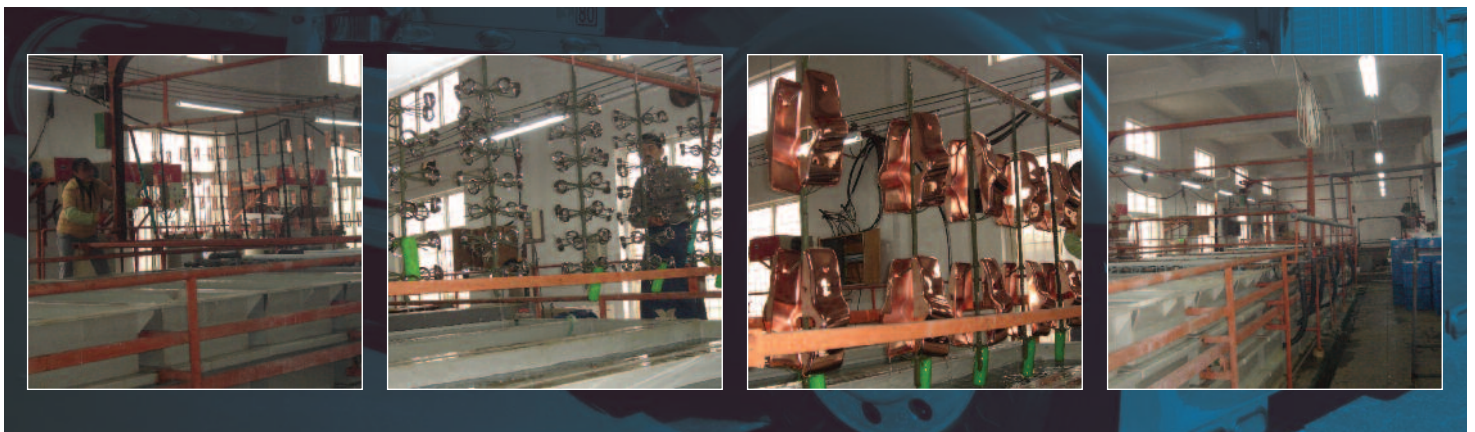

UNITED PACIFIC SHANGHAI

In 2005, United Pacific opened United Pacific Shanghai. Staffed with 3 quality assessment engineers and 2 logistic support personnel, United Pacific Shanghai serves as United Pacific's quality control and logistics office in China. Located in the commercial center of China, the Shanghai office provides United Pacific with unparalleled access to local markets and suppliers. The open access translates into faster product development and more rigorous quality control standards. The opening of the Shanghai office means that there will be a United Pacific employee hard at work for our customers 24 hours a day in different parts of the world.

UNITED PACIFIC CHROME PLATING

United Pacific's commitment to quality led United Pacific to invest in its own chrome plating facility. With one chrome plating line fully operational and another in construction, the chrome plating plant will ensure that United Pacific products meet our strict quality control standards. Better products mean better sales for United Pacific customers.

Hard at work for our customers

UNITED PACIFIC JOINT VENTURE

Here at United Pacific, collaboration is at the heart of our business. We partner with manufacturers that are as passionate about well-made and well-designed products as we are. In 2006, United Pacific entered into the ultimate collaboration. United Pacific formed a joint venture with China's largest manufacturer of heavy duty trucking products. The joint venture currently supplies all major American and Canadian aftermarket distributors (including United Pacific competitors) with stainless steel, chrome, and exhaust products. Because of our collaborative approach to product development and manufacturing, we're able to eliminate undue inefficiencies and cost. As a result, United Pacific customers benefit from unique products that are offered at the best possible price and the highest possible quality.
